

JUBER SHAIKH

SENIOR FULL-STACK & AI APPLICATION ENGINEER

Dubai, UAE | zubairnuc@gmail.com

[linkedin.com/in/jubershaikh](https://www.linkedin.com/in/jubershaikh) | github.com/CodeWithJuber | <https://codewithjuber.github.io/>

PROFESSIONAL SUMMARY

Enterprise application engineer with 11+ years across aviation, financial technology, healthcare and cloud-native systems. Combines Java/Spring, Node/NestJS, Python/FastAPI and modern web engineering with customer-site delivery, secure integration, production support and public work on agent reliability, model-independent memory and governed connectors.

CORE CAPABILITIES

- Application engineering: Java 8/11/17, Spring Boot/MVC, Hibernate/JPA, Node.js, NestJS, Express, Python/FastAPI, Rust, React, Next.js, Angular and TypeScript.
- Cloud and architecture: AWS, microservices, REST/SOAP APIs, event-driven systems, Docker, Kubernetes, Terraform/CloudFormation, CI/CD and production support.
- Data and security: PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB, Redis, Elasticsearch, Kafka, SQS, OAuth2/OIDC, JWT, Okta and Kong.

PROFESSIONAL EXPERIENCE

Assistant Consultant / Senior Full Stack Developer, Tata Consultancy Services

Emirates Group, Dubai (on-site) | Dec 2023 to Present

- Contribute to enterprise APIs and microservices across Java/Spring Boot, NestJS, React/Next.js/Angular, PostgreSQL and AWS.
- Deliver authentication, profile, tier and points-related workflows using Okta and secure enterprise integration patterns.
- Support testing, root-cause analysis, production readiness, SonarQube quality controls and CI/CD delivery.
- Review code and mentor engineers while coordinating with customer and cross-functional delivery teams.

Senior Full Stack Developer (Contract), SavvyMoney

Remote | Feb 2023 to Dec 2023

- Built secure loan-data ingestion and processing components with Java 17, Spring Boot and modern JavaScript frameworks.
- Implemented AWS workloads using Batch, ECS/Fargate, S3, SQS, DynamoDB and KMS with CloudFormation and SSM.
- Integrated Kong, OAuth and Jenkins pipelines, including privacy-conscious data handling and operational support.

EARLIER EXPERIENCE

Senior Full Stack Developer, ENoah iSolution

Altais Health | Sep 2021 to Feb 2023

- Delivered Java 17/Spring services and Angular/React interfaces using Kafka, Redis and PostgreSQL.
- Supported architecture, code quality and mentoring across healthcare application delivery.

Technical Lead / Senior Developer

ExtremLogic (2021) | Nityo Infotech (2019 to 2021) | VS2H (2018 to 2019) | Nucsoft (2015 to 2018)

Progressed through technical leadership and full-stack engineering roles spanning enterprise Java, web applications, integrations and delivery support.

SELECTED OPEN-SOURCE AI ENGINEERING

- ForgeKit: Node.js CLI/MCP toolkit for shared agent memory, change-impact analysis and pre-action guardrails across AI coding tools. github.com/CodeWithJuber/forgekit
- Mizan: Experimental Python/FastAPI system with WebSocket APIs, agent orchestration and Docker workflows. github.com/CodeWithJuber/mizan
- Hikmah Stack: Model-independent agent capability system with a Rust cognitive kernel for provenance, contradictions, commitments and verification state. github.com/CodeWithJuber/hikmah-stack
- Connector Hub: Rust CLI/MCP connector catalogue with explicit confirmation states, SSRF controls and a hash-chained audit ledger. github.com/CodeWithJuber/connector-hub

ADDITIONAL LEADERSHIP

Founder (Part-time), Hostlelo

2017 to Present

Operate hosting and cloud infrastructure initiatives alongside full-time engineering work.

EDUCATION & ADDITIONAL INFORMATION

- B.E., Electronics and Telecommunication, University of Mumbai, First Class, May 2014.
- Languages: English, Hindi, Urdu and Marathi.
